

Software to easily create financial projections for clients

Save time, ensure accuracy, and collaborate with clients

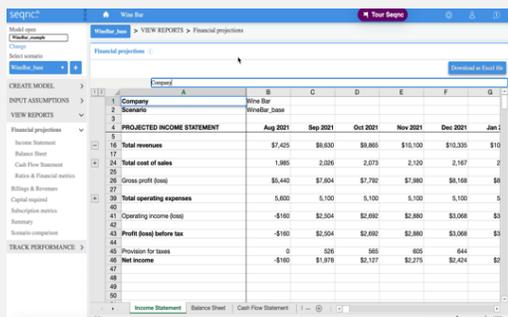

“Great platform that allows the client to be involved in their company’s financial projections”

Amir Lang
Business Advisor, UTSA SBDC

“Having software that will help the small business owner with: financial planning, modeling, forecasting, and tracking performance is precisely what my client needed, Thanks to Seqnc.”

Isaiah Blakely
Business Advisor, Tarrant SBDC

Financial Projections to Help Your Clients Succeed

Seqnc provides cloud-based software to create financial projections easily for the businesses you support. We have worked with SBDC advisors to help them build income statement, cash flow, ratios, and, capital requirements forecast for clients. Customers use our software to:

- Secure bank loans
- Understand capital requirements
- Plan for growth
- Prepare a budget
- Monitor business performance

Flexible and Easy to Use

Our software is simple and intuitive, without limiting flexibility to create a model to fit your client’s business. Your projections can be as simple or sophisticated as you’d like. Seqnc is spreadsheet-friendly to make it easy to input assumptions and reuse prior work. Get started with a template, import line items from QuickBooks Online, or start from scratch and – whichever option suits your requirements. Our solution optionally integrates with accounting software to track business performance and update a forecast if needed. It’s easy to test assumptions and compare different scenarios with Seqnc. Share and collaborate with clients at every stage of the process as you’d like. Seqnc generates a range of comprehensive reports for presenting to lenders, investors, and stakeholders. No upfront setup or professional services is required; create an account and get started right away. Use our software for an established company or for a new company without any financial history.

How We Work with SBDCs

We share the goals of the SBDC to foster new ventures, create jobs, and facilitate access to capital. Our expertise comes from having built hundreds of financial models for a variety of applications and industries.

We offer an extended trial period, special pricing, and services for SBDCs. Working with our software will help business advisors save time, manage multiple client models, and provide insights on client’s business.
