Executive Summary

Opportunity

Problem

It's hard to buy a good bike in Metroburg without being an "insider" cycling expert.

Solution

Garrett's Bike Shop is a snob-free zone where regular people can get top-notch gear and expert advice.

Market

The primary market for Garrett's Bike Shop is the university's student population. The secondary market is the university's faculty and staff, and the tertiary market is the greater Metroburg community (where the shop is located).

1. University students are the primary target market:
They are mostly undergraduates, so there is a 25% annual turnover.
2. The lack of parking in the university area and the general ease of bike mobility throughout Metroburg motivates them to use bicycles as inexpensive transport. Also, local mountains and trails appeal to those who ride bikes for sport.
3. There is a new enthusiasm for retro Cruiser bikes, as well as more advanced cruiser-style bikes, among the college population.
4. There is also a market for bike accessories, such as racks, locks, bags, fenders and rainwear.
5. They want convenience for sales and service.

Competition

Current Alternatives:

- One multi-sport store at the local megamall.
- One statewide chain of bicycle shops which started out as Schwinn-only, but has since taken on other brands and products.
- One used bike store that has formed a dependable business reputation for itself, dealing strictly in used bikes.
- Three local bike shops, including the oldest shop in town.
- One chain that specializes in opening shops in small local malls near new housing developments.
- Several garage mechanics offering service only.

Why Us?

Garrett's Bike Shop offers a welcoming, family-friendly bike shop with higher quality gear and services.

Expectations

Forecast

This financial plan was developed based on previous years' data for the existing store, tracking trends in revenues and expenses. A five-month track of sales, accounts receivables and payables, and inventory from a year-end benchmark was carried out.

The current owner, Han Delbar, has sold the business to Hubert Wheeler for \$140,000. The seller, buyer, and accountant worked together on the plan to balance optimism with reality. An attorney was consulted on the specifics of the sale contract.

Sales for the first year of new ownership are projected above \$500,000, with a gross margin of almost 65%. Profitability is expected at the halfway point of the fiscal year in March.

Financing Needed

The shop plans on bootstrapping the business to start, but may consider loans for future expansion.

Financial Highlights by Year

Opportunity

Problem & Solution

Problem Worth Solving

No full-service bike shop offers a snob-free zone that tailors to the university market.

Our solution

The market niche has several needs which the shop strives to meet:

- Quality bikes at several price points.
- Various styles and sizes of bikes, leaning heavily toward the styles most popular among students.
- Range of accessories most practical in the local setting, such as locks, fenders, lights, tires, seats, and rainwear.
- Plenty of replacement components and service parts.
- Friendly, personal relationships between cyclists and shop staff.
- Quick and convenient service from on-the-spot flat tire fix to drop in repairs to scheduled major maintenance. The rider can drop their bike off, head to class or work, and be assured that it will be ready for the ride home.

Target Market

Competition

Current alternatives

- One local multi-sport store at the local megamall
- One statewide chain of bicycle shops which started out as Schwinn-only, but has since taken on other brands and products.
- One used bike store that has made a reliable business reputation for itself, dealing strictly in used bikes.
- Three local, including the oldest shop in town.
- One multi-location chain that has specialized in opening shops in small local malls in areas of new housing developments.
- Several garage mechanics offering service only.

Our advantages

The foremost competitive advantage of Garrett's Bike Shop is its university location. The university is over 100 years old and as it has grown, Metroburg has as well. Parking is almost nonexistent with all campus parking being either permit or meter controlled, plus local streets are filled to capacity with the vehicles of residents. Bicycles are therefore an obvious and popular transportation solution.

Negotiations of the past two years also bring the advantage of continued financial agreements with major suppliers. This is an advantage over startup bicycle shops, but is more a leveling of the playing field compared to other established shops in Metroburg.

Traditionally, startup stores will be placed on a Cash On Delivery (COD) status by bicycle manufacturers and parts/accessories suppliers. The COD status stays in effect until the new shop demonstrates its ability to manage orders and cash flow. This also means the new shop must have more funding to be able to write checks at a moment's notice for large amounts.

Execution

Marketing & Sales

Marketing Plan

The marketing strategy of Garrett's Bike Shop is to establish anticipation of the store's opening in the community so it can hit the ground running with retail sales immediately upon launch. Garrett's Bike Shop will be more than a store; it wants to build a community and enjoyable buying experience. To that end, the following tactics will be used:

- A Facebook company page with targeted ads and a stream of posts emphasizing health, quality gear, expert advice, and community. It will have a local biker community within the page so people can come and engage with the others who share their passion. The page will also showcase store news, community members, and raffles to take advantage of word-of-mouth marketing and grow organically.
- An Instagram company account that shows pictures of new gear, employees, community members, and more. It will implement the use of hashtags to increase traffic.
- A YouTube company channel dedicated to educating bikers about troubleshooting problems, expert advice, and community building.
- A Twitter company account that emphasizes biking-related news and its community.
- Emphasize Yelp and Google Reviews after transactions to boost ratings and community engagement
- Direct mail of flyers to a select list of 5,000 high income households.
- Advertisements in local newspapers and magazines.
- Flyers in the downtown area around the site of the shop.
- Launch of the website in anticipation of opening.
- Yellow Pages listing.

Sales Plan

There are sales strategies for both retail and E-commerce sales.

Retail sales will be based on the marketing of the store and its location, explained in the marketing plan section. At an operational level, customers will engage with experts working the floor of the store (two on duty at any given time), or with the office clerk over the phone or Internet. These experts will educate customers about best practices and assist them through the process of purchasing the correct product.

Customers will be greeted with a standard greeting and served to meet their satisfaction with focus on providing expert service. Customers will have a few seats in the store to sit in comfortably if they have to wait for assistance.

Operations

Locations & Facilities

Garrett's Bike Shop is a 1,500 square foot store of interior space located on the university campus in Metroburg. The location—the first block off campus in a commercial area featuring the university bookstore, a private bookstore, bank, cafes, coffee shops and popular watering holes — is ideal. It gets constant daily visual exposure to the target market. Students and staff travel the sidewalk outside the front door, generating lots of paying customers. The nearest competitor is almost a mile away, so for the student customer on foot and in a hurry, Garrett's Bike Shop is the immediate solution to their needs.

Technology

The bike shop is equipped with a range of technology to help maintain any customer's bicycle needs. Whether older bike parts or newer technologies, inventory has whatever is needed to ensure that a bike stays in peak condition.

With a customized online tracking system, the shop can keep record of what part of a bike was addressed from the last visit and maintain an ongoing record for future visits. This allows the experts to specialize a customer’s visits each time they enter the shop.

Equipment & Tools

All bikes require service ranging from basic tune-ups to complex maintenance. With an array of bikes in mind, the shop has the right equipment and tools to cater to any biking needs.

Milestones & Metrics

- Inventory turnover
- Sales per square foot
- Cost of training employees
- Number of return customers
- Number of reviews that customers write
- Favorite brands
- Average price of bike (new and used)

Company

Overview

Ownership & Structure

Garrett's Bike Shop is a subchapter S corporation currently owned by **Han Delbar**. **Hubert Wheeler**, current assistant manager of Garrett's Bike Shop, is purchasing the business from Delbar. He will acquire existing inventory, assume outstanding accounts payable and dating program debts to suppliers, location lease, customer base and information, and Garrett's Bike Shop's business name and goodwill. The business will continue to be a subchapter S corporation. Exchange of ownership will occur on July 1.

To establish an accurate accounting of existing inventory and outstanding debts, the prior year's closing inventory and year-end financial statement as reviewed by the business' CPA were used as benchmarks. The sales, orders placed, deliveries received, and accounts payable payments made have been tracked each month, and a trial balance of these will be run June 15 to establish the final purchase price for inventory on hand, and the amount of accounts payable assumed. The figures presented here are conservative, realistic estimates used for planning purposes.

Company history

The current assistant manager, **Hubert Wheeler**, is buying Garrett's Bike Shop and will manage the business. He has a B.S. degree in Economics and an M.A. in Comparative Literature. His passion, however, has always been cycling.

Hubert originally worked at his local bike shop when he was in college. After several years trying to find suitable work in his degree

field, he gave up chasing the chimera of these industries and decided to work with something substantial: his youthful enjoyment of bicycles.

He attended two of the major bicycle mechanic training programs at New England Bicycle Academy and the United Bicycle Institute. These courses covered mechanical service and maintenance, frame building and repair, wheel building, and shop organization, sales, and management. He has 12 years of progressively responsible experience in bicycle shops, with the last five at Garrett's Bike Shop.

One of the other full-time employees, **Valerie Pede**, has expressed interest in learning more about the bike industry. She will be promoted to the new assistant manager. Val has been with Garrett's Bike Shop for three years. She graduated from State University at Metroburg with tandem B.S. degrees in Exercise Physiology and Recreation Management. Val loves to cycle and has kept her contacts at the university active. Her knowledge and expertise draws many female bicyclists to our store, where they know they will get the care and attention which is usually absent from traditionally male-staffed shops.

Team

Management team

Garrett McKenzie – Founder/Owner
After a successful run as a mortgage broker, Garrett will apply his business acumen to leading a company he is passionate about.

Jill Bloom – Shop Manager
After a decade of bike-shop experience and five completed triathlons, Jill will anchor the services side of the business.

Advisors

Tom McKey - Tom is a CPA with twenty-five years of experience advising dozens of startups and small businesses.

Heather Gibson - Heather is an avid cyclist and small business investor. Her expertise is in small business expansion.

Financial Plan

Forecast

Key assumptions

Sales vary season to season and with the academic school year.

Surprisingly, summer is the slowest season because there are fewer students in town. Business picks up in August with the return of university students and staff and then flourishes in September.

Accessories and rainwear sales increase in the autumn and early winter, while repairs and maintenance remain steady. Holiday sales are brisk, though generally leaning on accessories, parts, rainwear, gloves, helmets, headlights, and more. Winter sales are moderate, and then pick up in springtime as people put away their skis and look forward to local outdoor activities, longer daylight hours, and drier weather.

Garrett's Bike Shop has three large sales promotions each year based on those assumptions:

1. Back to school in August/September. This is the biggest sale of the year - it offers new bicycles, locks, helmets, racks, fenders, and backpacks. These bikes will almost always sell out to students seeking great values.
2. Year-end holidays. This sale overlaps with the beginning of winter term. The retail market demands some participation in this annual buying frenzy, yet the sale produces lower revenue than our other two events. The shop sells fewer bikes, but more accessories and clothing.
3. Spring. This coincides with the return of nice weather and the beginning of spring term. New bicycles, as well as repair, maintenance, and tune-up specials are featured. It is important for the shop to have a good selection on hand at this time because when people decide they want a new bike, they want it immediately. If the shop doesn't have the bike at that time and can't make the sale, many riders decide that they can get another season out of their old bike and will spend their discretionary income on somewhere else.

Additionally, the shop has some special promotions and events available for June graduation.

These sources generate a small monthly revenue:

- Sale of used bicycles taken in on trade.
- Repair classes taught at the University Outdoor Center, once a term.
- Monthly service contract for repairs and parts with the University Security Office.
