

SCHULTZ technology

I.T.'s best friend

VOICE OVER (VOIP) PHONE SOLUTIONS

We have adapted our on-the-go lifestyle to our need for more efficient technology. VoIP gateways can be combined with traditional PBX functionality, enabling businesses to use their managed intranet for a single network for voice and data. This results in greater cost savings, greater mobility and increased redundancy.

Cost Savings (30% on Average)

Unlimited local and long distance, cheap international rates and no maintenance expenses.

Productivity

Boost employee and customer satisfaction through VoIP's feature-rich interface. Always remain a step ahead when it comes to communication needs at the workplace.

Scalability

Adaptable and customizable service. When your business grows, shrinks or changes, we can adjust your services as needed.

Mobility

Make and receive calls or forward calls to your mobile phone with an internet connection.

"Once we decided to make the switch to Clear Voice VoIP, Schultz took control and made the transition as easy and seamless as I could have ever imagined. Now, after a few months using Clear Voice, we couldn't be happier. Not only is the service spectacular, but it is also saving us over \$2,000 a month!"
